

GAME DESIGN DOCUMENT

Title: TastyCake

Theme: “The cake is a lie” / Greed has consequences

The game explores temptation and excess. The player is rewarded for collecting cake but punished for overindulgence.

Platform

PC (Windows) / Web (optional)

Engine

Unity 6.3 LTS

Core Gameplay

A 2D side-scrolling platformer where the player collects cakes while avoiding traps.

- Player can move left/right and jump
 - Cakes increase score
 - Traps activate progressively as more cakes are collected
 - Some traps cause respawn
 - Excessive cake consumption leads to permanent death
-

Controls

Action Input

Move A / D or Arrow Keys

Jump Space

Pause ESC

Resume UI Button

Restart UI Button

Progression System

Cakes Collected Effect

1	Audio feedback (“oyeshi”)
2	Ground spikes activate
3	Moving spikes activate
5	Extra spike activates
All	Permanent death

Win Condition

Reach the exit flag **without consuming all cakes**.

Lose Condition

Consume all cakes → permanent death.

Audio Design

- Start: “cakeeee”
- First cake: “oyeshi”
- End (win or greed death): “hihihihaw”

Audio reinforces emotional feedback and irony.
